

Project Purpose:

Cross Valley Rail Project will upgrade and replace the Rail Corridor from the cities of Visalia to Huron through Tulare, Kings and Fresno Counties.

Description:

This project will reduce truck traffic, which will provide an improvement in air quality and increased safety in streets and highways. The rail upgrades also will improve freight service to commercial and industrial customers in and along the Corridor that will result in significant public and economic benefits for them. This includes increased opportunities for industrial development and employment.

Construction Cost: \$14.2 Million

Funding Sources:

The Cross Valley Rail Improvement Project will receive \$4 million from Governor Davis' Transportation Congestion Relief Program (TCRP), with the remaining funding provided by the Regional Improvement Program (RIP) and local funds.

Agency Responsibilities:

The Lead Agency for this project is Joint Powers Authority, formed by the cities of Lemoore, Huron and Visalia, and funding from 12 different agencies, including federal, state, local, and private groups.
